

# MICROPROCESS DC CURRENT AND DC VOLTAGE AND FREQUENCY(PULSE) CALIBRATOR METER

MODEL  
MDFG

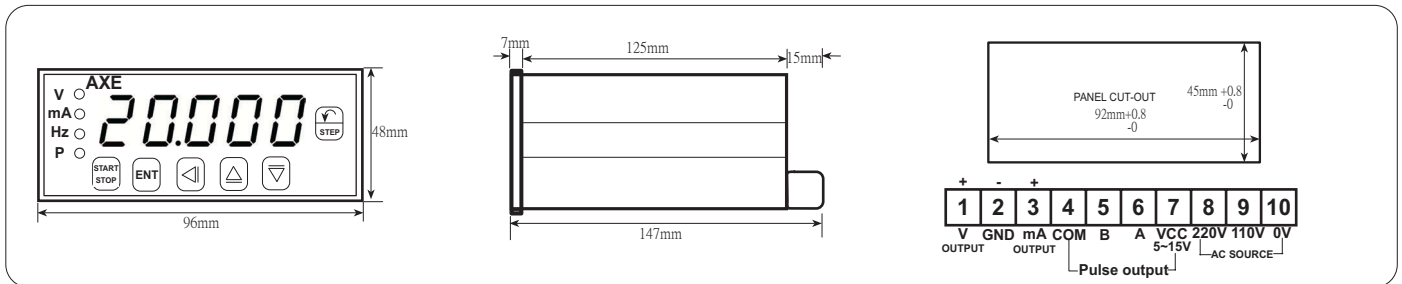

## ■ FEATURES

- Accuracy 0.05% F.S.
- Calibrator for DCmA and DCV and Frequency(Pulse)
- Simulator A,B phase different 90° output function
- 15 bit DAC analog output function
- Output range for DC 0 to 20.000mA(DC 0 to 10.000V)
- Wide output range for frequency 10Hz to 4KHz
- Wide output range for pulse 1 to 10000 count
- Dimension small and High stability
